SUMMARY

Frontend, mobile, and full-stack developer who builds modern, scalable, user-focused products with **React, Next.js, TypeScript, and Tailwind CSS** on the web and **React Native and Expo** on mobile, with experience from internships at FlexiSAF, HNG, and Chaindustry and from freelance client work.

I build and ship complete products end to end on **Supabase**: Postgres schemas with row-level security, authentication (email/password and Google), role-based admin dashboards, file storage, realtime messaging, serverless functions, and **Paystack** checkout with server-side payment verification. My mobile apps share the same Supabase backend as their web versions and ship as installable Android builds with EAS Build.

TECHNICAL SKILLS

Frontend

React.js · Next.js (App Router) · TypeScript · JavaScript (ES6+) · Vite · React Router · Tailwind CSS · shadcn/ui · Radix UI · Framer Motion · React Hook Form · Zod · HTML5 · CSS3

Mobile

React Native · Expo · Expo Go · EAS Build · NativeWind · React Navigation · Device GPS (expo-location) · Image Picker & Uploads · Android APK Builds · Shared Web + Mobile Backend

Full-Stack & Backend

Supabase · PostgreSQL · SQL · Row-Level Security · Supabase Storage · Supabase Realtime · Vercel Serverless Functions · Node.js · Express.js · MongoDB · REST APIs

Auth, Payments & Integrations

Supabase Auth · Google OAuth · Cookie-based SSR Auth · Role-Based Access Control · Protected Routes · Paystack (Inline & Hosted Checkout) · Server-side Payment Verification · Payment Replay Protection · Deep Linking · JaaS / WebRTC

Blockchain

Solidity · Hardhat · Ethers.js · Wagmi · Viem · IPFS / Pinata

Tools & Practices

Git · GitHub · Figma · Vercel · Netlify · Postman · Agile / Scrum · Responsive & Mobile-First Design · Accessibility (a11y) · Performance Optimization

PROFESSIONAL EXPERIENCE

Frontend, Mobile & Full-Stack Developer — Freelance / Remote 2025 – Present

- Build responsive, animated web applications with React.js, Next.js, TypeScript, Tailwind CSS, and Framer Motion
- Build React Native / Expo mobile apps that share a Supabase backend and auth with their web counterparts
- Deliver full-stack products with Supabase (Postgres, RLS, Auth, Storage, Realtime), admin dashboards, and Paystack payments
- Deploy production projects on Vercel and Netlify, collaborating directly with clients from design to launch

Frontend Developer (Internship) — FlexiSAF 2025 – 2026

- Contributed to user-friendly, scalable frontend applications using React.js, TypeScript, and Tailwind CSS, including the ApplyNow admission portal
- Collaborated with engineers and product teams in a fast-paced development environment
- Built responsive UI components and participated in architecture discussions, debugging, and feature implementation

Frontend Developer (Internship) — HNG Internship 2024 – 2025

- Built production-ready frontend projects with modern JavaScript tooling in fast-paced, task-driven sprints
- Sharpened debugging and frontend optimization skills through practical, team-based tasks

Frontend Developer (Internship) — Chaindustry 2023 – Present

- Built responsive interfaces and interactive user experiences for real-world and blockchain-adjacent projects
- Contributed to UI consistency and design implementation within a collaborative team environment

EDUCATION & CERTIFICATIONS

University of Uyo
Uyo, Nigeria

Distinction Soft Skills Program
Productivity, Collaboration, Problem Solving, Communication, Emotional Intelligence for Tech Professionals

FlexiSAF Frontend Development Training
Abuja, Nigeria — in progress

SELECTED PROJECTS

Dali Stores — Dali Wears Online Store daliwears.shop ↗

Full-Stack · Next.js 16 (App Router), Supabase (Postgres, SSR Auth, Storage), Paystack, shadcn/ui, React Hook Form, Zod

Production fashion store on its own domain, rebuilt from scratch on Next.js; the same backend powers the mobile app.

- **Paystack:** inline popup on web and server-initialized hosted checkout for mobile; every payment verified server-side (success, exact amount in kobo, and replay protection so one receipt can't pay two orders)
- Order totals priced in Postgres from real product and discount prices, so stale or tampered carts can't change the amount charged
- Delivery tracking (stages, courier, tracking timeline), coins rewards (check-ins, streaks, referrals), pre-orders, sizes, discounts, and reviews with photos
- Admin dashboard for products and media, orders, chat, users, analytics, and settings; cookie-based SSR auth with route protection; custom domain with redirects and dynamic sitemap

GetGigs — Service Marketplace

Live ↗

Full-Stack · React, TypeScript, Supabase, PostgreSQL

Location-based marketplace connecting verified local service providers with customers.

- Designed a full Postgres schema with row-level security on every table
- Built auth, provider search and profiles, and an 8-step provider onboarding wizard

GetGigs — Mobile App

Android · Expo

Mobile · React Native, Expo, NativeWind, Supabase Realtime

Native companion app sharing the GetGigs Supabase backend.

- Email and Google sign-in; nearby providers via device GPS (expo-location)
- Service requests with photo upload and realtime chat on Supabase Realtime

Dali Wears — Mobile App

Android · EAS Build

Mobile · React Native, Expo, React Navigation, Supabase, Paystack

Store app sharing the Dali Stores Supabase backend and payment API.

- Paystack hosted checkout in an in-app browser with deep-link return, verified on the server
- Coins wallet with daily check-ins and referrals via Postgres functions; order tracking

PetPi — Pet Marketplace

Live ↗

Full-Stack · React, TypeScript, Supabase, PostgreSQL

Marketplace for pets, supplies, food, toys, and care products.

- Supabase auth, wishlists, and a role-based admin dashboard
- Database-driven homepage and site settings managed by the owner

Homemedy — Real Estate Marketplace

Live ↗

Full-Stack · React, Supabase, React Hook Form, Zod

Marketplace for buying, selling, and discovering property.

- Search and filters by location, category, and price; inquiries to agents
- Supabase auth with password recovery; admin dashboard with analytics

City De Fitness

Live ↗ Code ↗

Frontend · React, TypeScript, Framer Motion, JaaS/WebRTC

Premium fitness platform with live virtual coaching.

- Animated, responsive interfaces with parallax and counters
- JWT-authenticated JaaS/WebRTC video sessions for live training

NFT Marketplace

Live ↗ Code ↗

Web3 · Solidity, Hardhat, Ethers.js, Wagmi, Node.js, MongoDB

Decentralized marketplace with custom smart contracts.

- Factory, ERC-721, and marketplace contracts for minting, sales, and auctions
- Node.js/Express/MongoDB event indexer; IPFS storage via Pinata

ATS Pro — Resume Checker

Live ↗ Code ↗

Frontend · React, TypeScript, Tailwind CSS

Private, in-browser tool that scores resumes against job descriptions.

- Client-side resume parsing and ATS-style keyword match scoring
- Keyword gap analysis with actionable suggestions

More projects: ApplyNow Admission Portal — multi-step admission form & admin review dashboard · NextVest — blockchain investment dashboard (React, Solidity, Supabase) · WhatsApp Bot — chat UI with AI-ready architecture · Smart Invoice — invoice builder with PDF export (Next.js) · ClientPilot — client management dashboard · Landing Page Generator — themed page builder with live preview
